

Report Of Change

This student has decided to change the “View Chart by Violation Code” analysis tool to “compare violation” analysis tool because this student has left his former group and done the assignment alone in a new group number. To prevent the same result with his former group, it is important for this student to change this fifth analysis tool. Note that the Project Plan Document was updated due to this change.

The figure 1 shows the former idea of the fifth analysis tool.
